

RING SIZING CHART

INSTRUCTIONS

- This size guide must be printed on 8.5" by 11" paper.
- Before printing, go to "more settings" and ensure "page scaling" is set to "none."
- Use the "measuring scale" to ensure the guide's scale is accurate.
- Avoid measuring your fingers when they are cold or damp, as they will be smallest.
- Bands and rings over 5mm in width may fit your finger more tightly than rings of the same size in narrower widths so you might want to consider going up in size; contact us if you're unsure.

OPTION 1 - CREATE YOUR OWN

- Using the paper ring sizer below, wrap the ring sizer snugly around the widest part of the intended finger so that the numbers are visible to you, and insert the pointed end through the slit you made in the sizer.
- Make note of the number that lines up with the slit, this is your ring size! Keep in mind that quarter sizes are also available if your sizer indicates that you are between whole and half sizes.

OPTION 2 - SIZING A CURRENT RING

- Lay the ring over each of the size circles below, until you are able to closely match the inside edge of the ring to one of the circles on the guide.
- If the ring falls in the middle of two sizes, it is best to order the quarter size between sizes

Note: This is not a 100% accurate way of sizing yourself, it is always best to get professionally sized.
